

## WILDCARE: FRIENDS OF LUMEAH POINT

### Newsletter May 2015

#### **Feral Oyster Removal 6.30a.m. Sunday 24<sup>th</sup> May**

Here's your opportunity to have a last crack at the feral oysters for this Summer/Autumn. Yes, that was summer. Our objective for the final oyster removal for the season is to clear the foreshore up to the large gum tree (you know the one). A registration desk will be set up at 6.15a.m and it is essential that participants register and read the safety guidelines. If you can bring a cold chisel, hammers, tomahawks or other suitable tools as well as safety goggles that would be great. Gloves will be available if required. Solid, enclosed footwear is required and appropriate sun protection recommended.

If you plan to attend the oyster removal it would be helpful if you would contact us.  
Phone or SMS 0439000391, email: [garry.hulme@gmail.com](mailto:garry.hulme@gmail.com)

#### **Latest news on the proposed 5 year plan**

Following input from residents concerned about increased and inappropriate vehicle use of the NE end of the point we have put the submission to Crown Land Services on hold. We will discuss the issues with CLS and promote our project to consider, design and install appropriate signage. As with all projects we undertake this will include wide stakeholder consultation before implementation. Further views are welcome, in fact encouraged.

Crown Land Services are of course entitled to take whatever action they deem appropriate independently of our discussions but have proven very cooperative to date.

---

**MISSION – To preserve Lumeah Point and maintain the lifestyle, environment and common usage of the area for the benefit of the residents and wider community.**
